Education

University of Maryland College Park, MD
B.S. in Computer Science Expected December 2029

- **Relevant Coursework:** Computer Systems, Discrete Structures, Object-Oriented Programming I & II
- **Honors:** UMD Dean's Scholarship, Delegate Ryan Spiegel Legislative Scholarship, Governor's Merit Scholar, National Merit Commended Student, AP Scholar with Distinction

Experience

App Development Club September 2026 – Present
Web Development Bootcamp Member University of Maryland

- Apply full-stack web development skills through hands-on exercises using React, FastAPI, Git, and cURL.
- Engage in weekly technical workshops and mentor-led sessions covering front-end and back-end development.

Independent Software Engineering Mentorship June 2025 – July 2025
Mentored by a Software Engineer at Johns Hopkins Applied Physics Laboratory

- Applied software engineering principles through 2 Python projects using REST APIs, Git, command-line tools, debugging, and modular programming.
- Developed Python projects using custom stack, queue, and tree data structures, and presented the final implementations and technical decisions in a concluding briefing.

Sarah's Handmade Ice Cream & Treats March 2026 – August 2026
Ambassador Rockville, MD

- Managed point-of-sale transactions, food preparation, and customer service during high-volume shifts.
- Served hundreds of customers during peak periods while maintaining accuracy, efficiency, and a positive customer experience.

Projects

Document Management System | *C* 2026

- Built a modular document-processing system in C to manage paragraphs, lines, and text operations through structured document representations.
- Implemented string manipulation, pointer-based operations, and file I/O to load, modify, and process document contents.

Town Graph Pathfinding Application | *Java* 2026

- Implemented Dijkstra's algorithm in Java, using a HashMap adjacency list and a PriorityQueue to compute shortest routes between Maryland towns.
- Designed a weighted graph representation of towns and road connections to reconstruct routes between user-selected locations.

Basketball Team Tracker | *Python* 2025

- Developed an interactive basketball team-tracking application using Python and Streamlit to consolidate team statistics into a centralized interface.
- Parsed, organized, and transformed basketball statistics to display team performance data in a structured, user-friendly format.

Technical Skills

Languages: Python, Java, C
Frameworks & Libraries: React, FastAPI, Streamlit
Tools & Technologies: Git, GitHub, REST APIs, VS Code, Eclipse, PyCharm, macOS/Linux Command Line

Leadership & Activities

Quince Orchard Varsity Basketball | Co-Captain 2024 – 2026
National Technical Honor Society | Vice President 2024 – 2026
FCA Power Camp | Basketball Huddle Leader 2023 – 2025
